# Palette**Invoice**

Palette**Invoice** is the leading solution for electronic processing of supplier invoices. As a component of the Palette**Arena** family of products it is recognized as the most advanced and flexible fully web based system in the market today. When used in conjunction with other Palette**Arena** products, Palette**Invoice** represents the industry's most automated approach to Enterprise Purchase to Payment. Palette**Arena**s award winning design allows it to be deployed within your company's IT infrastructure or in the cloud as a SaaS based solution.

Investing in PaletteInvoice provides rapid return on investment through increased efficiency, reduced processing costs and enhanced control. It's all about automation. Paper invoices are scanned and interpreted, while electronic ones are delivered directly into the system. Invoices are matched with purchase orders, contracts or other sources of identification, then routed via workflow directly to the ERP for booking and payment, or to users for approval or exception handling depending on your processing requirements. Palette's unique cascading matching system is at the heart of this highly automated solution. Efficient matching and routing using PaletteInvoice's fully automated workflow provides users and managers with complete control and visibility. Invoices are controlled and tracked from the time they are received and until payment is made. A complete audit trail compiles critical business information as invoices flow through the system to ensure and document all process steps and changes.

Unlike other solutions, where workflow is complex and requires programming, Palette invoice features a graphical designer that can be used by business people as well as IT to quickly and easily create workflows and matching selections to meet your ever changing environment.

At Palette we know that your business is unique and complex. Our products are designed to be configured by business users who can quickly adapt to new processing requirements. Approval hierarchies, authorization amounts, account coding templates, workflow design, users and other critical business criteria can be controlled by business people with proper permissions.

Palette**Invoice** is easy to implement, has an intuitive user interface and is delivered by one of the leading and most innovative companies in the market. PaletteInvoice has the following key features:

- 100% web based
- Unique cascading match system
- Compatible with all ERP systems
- Handles all types of e-invoices
- Web based approval system
- Easy to approve, split and reject invoices
- Advanced authorization hierarchy
- Compliant with laws and regulations
- Embedded archive for long term storage
- Geographic independence for branch offices
- Compatible with all similar technologies

In addition to improved working capital management, cost savings, increased efficiency and reduced risk for error or fraud, PaletteInvoice increases corporate control and makes your business more agile. Corporate governance, transparency and integrity of operations is made easier.

*"Every day thousands of users at over 900 corporations around the world enjoy improved efficiency and greater financial control thanks to Palette Software."*

# Take one
# step further!

PaletteInvoice is at heart of the PaletteArena product family. Used in conjunction with our other products, PaletteInvoice takes you one step closer to a fully automated Enterprise Purchase to Payment Environment.

- Palette**Connectivity Services**

Our Enterprise Purchase to Payment solutions automate the buyer-supplier value chain, providing efficient workflows, increased corporate control and effectiveness, flexibility to change, regulatory compliance and corporate control.

PaletteArena is not merely about process automation, As an enterprise business platform it allows your organisation to consider a strategic approach to business agility and change management in an environment characterised by increased globalisation, changing demands and increased competition. Our Solutions are designed to increase control, reduce risk, secure effectiveness of internal controls and achieve accountability for accurate accounting. PaletteArena contributes to improved corporate governance, by optimising process accuracy, securing accountability and provide access to reports and documentation, enabling compliance to regulation through out the organisation.

# We know how!

At Palette we know that long term stability and product innovation is important to our customers. Our corporate philosophy is to continue our unblemished track record of profitability, grow organically in a controlled manner and continue to develop our product and people. We continue to reinvest 15 percent of our annual revenues in R&D for the continued advancement of our products. Since 1993 this has proven to be a success, providing our organisation with know how – our most important asset.

Palette is recognised as a market leader in advanced process automation solutions – crossing work processes and organisations – providing efficiency across the value chain from purchase to payment.

Our main objective is to provide our customers with innovative leading edge products and services ensuring that our business relationships will be successful and long term. Palette is a privately owned company headquartered in Stockholm, Sweden and established in 1993. Currently, we have offices in Sweden, Norway, Denmark and the United Kingdom. We are a leading player in the Nordic market and have a growing network of business partners in Europe, North America and Australia.
