# FileBound QB Integration.
# Connecting Data, Documents and QuickBooks.

With the FileBound QB Integration, sharing data and documents between FileBound and your QuickBooks system has never been easier. By storing and managing your data and documents in a single source and effortlessly connecting systems, you maximize efficiencies while maintaining security and control.

Integration allows you to leverage your investment in technology, training and processes by delivering a document management solution right within your existing QuickBooks system.

**File Bound**®
Integration Platform

# FileBound
## Integration Platform

The FileBound Integration Platform is an easy-to-configure solution that reduces implementation and adoption time and provides the exchange services you need to be successful. Simply map data elements within your line-of-business applications and FileBound, schedule the updates and start the service. Data and documents that are added, deleted or changed in either system are now dynamically updated during each cycle.

**Business Process Integration**
The ability to combine the FileBound document management workflow with the FileBound QB data integration creates a powerful extension to your existing business processes.

**Data Integration**
Improve efficiency and reduce data entry errors by:
1. Importing data from QuickBooks into FileBound.
2. Exporting data from FileBound into QuickBooks.

**Simple Data Mapping**
Easy-to-use mapping configuration reduces implementation time and errors.

**Scheduling**
Schedule each import or export to run unattended to ensure the most accurate data is available at the right time

**Integration directly to:**
• QuickBooks
• Microsoft SQL Integration
• CSV Integration
